VOLUNTARY SUPPORT FOR EDUCATION

SCHOOL SUPPORT ASSOCIATION

In order to prepare the children of our country for the world of science and technology in the future, we embrace each of our children, accompany them at every moment with distance education technologies, and provide education by establishing rapport.

"We are a group of volunteers who believe that every child should have access to quality education and that well-trained youth especially in the field of basic sciences and engineering is critical for the rapid development of our country in the future. As Okul Destek Derneği, we approach education from a much more strategic perspective, try to plant the seeds of interest, curiosity, investigation and qualified thinking for mathematics and science in the hearts of children who will pursue careers in engineering and basic sciences in the long term. We also support them to grow up well-equipped with our Turkish and English programs. In addition, the issues of social responsibility, social benefit, vision development and self-expression that we will convey to students are also very important to us."

Orkun Oğuz, one of the Founders of Okul Destek Derneği and President of Board of Directors

OUR PURPOSE

Okul destek Derneği was founded to support enthusiastic students studying in public secondary schools to reach quality education in line with the curriculum announced by the Ministry of National Education and international good examples by using different educational technologies.

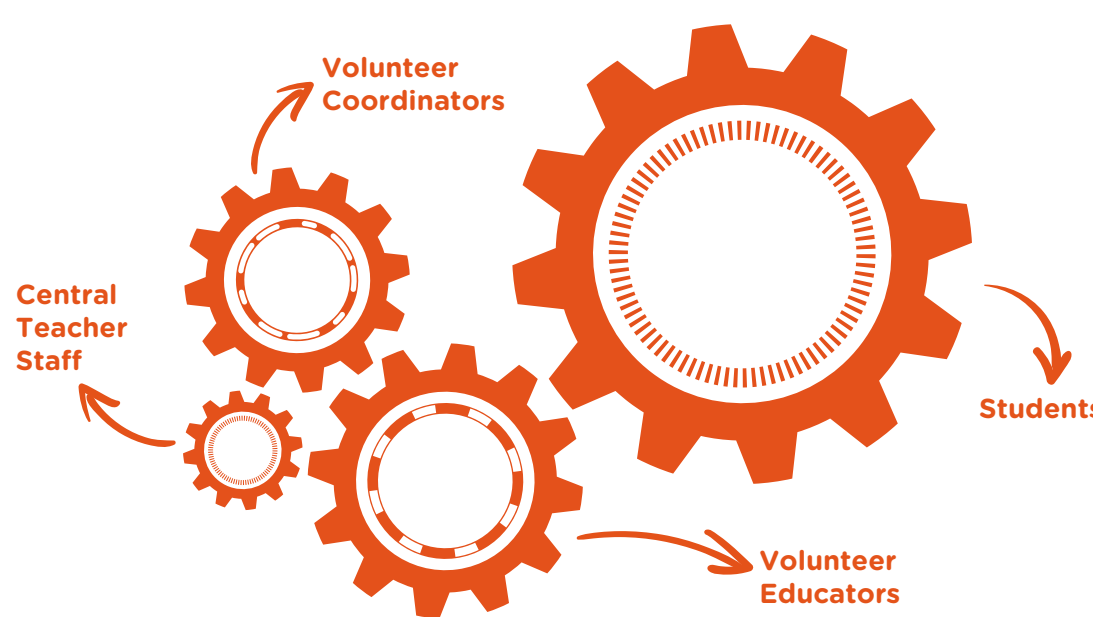

WHAT ARE ODD PROGRAMS?

- They focus on mathematics and science courses. In addition, Turkish and English course support is provided to selected mathematics and science students within the quota.
- An academic year lasts approximately 30 weeks.
- Weekly contents parallel to the Ministry of Education curriculum and in accordance with international PISA and TIMSS principles are prepared by our expert teacher staff at the center.
- While preparing the content, methods such as gamification and connecting with real life are used within the framework of advanced learning methods.
- Courses are given by volunteer educators of all ages and professions who meet Okul Destek Derneği criteria and have completed their training.
- They are delivered online in classes of an average of 10 students.
- There is 1 hour of online lesson and 1 hour of question and answer / conversation hour every week. Weekly homework is given.
- A tablet or mobile phone with internet connection is required.
- Student attendance in classes is compulsory.
- Our entire education program is free.

The cost of these free programs, which are organized entirely on a voluntary basis, are covered by donations from organizations and individuals who want to support education.

ODD FAMILY

Founded in April 2020, Okul Destek Derneği provides free courses to a total of **4000** students every week with nearly **700** volunteer educators as of 2024. Our total number of volunteers, including our volunteer administrative staff, is more than **700**.

Thanks to our supporters and corporate projects, our family is growing day by day.

OUR VOLUNTEERS

The best investment for the future is an investment in people.

If you want to invest in the future and provide social benefit, you are invited to Okul Destek Derneği.

If you are;

- Over 16 years old
- Willing to reach young minds and devoted to education
- Able to explain at least one of the mathematics, science, Turkish and English curriculum at the secondary school level
- Able to allocate a total of 3-4 hours, which you determine yourself, for education
- Able to use distance education platforms and confident in your communication skills Perhaps you are the educator our children need!

We invite everyone, who wants to be beneficial to society, to become a volunteer educator applicant.

"One of the things that cannot be neglected while life goes by is undoubtedly a bright future brought about by education. With this in mind, I spent 30 weeks with wonderful students at Okul Destek Derneği, among which I joined as a science volunteer educator and for which I felt great happiness. Once again, I would like to thank my students, who reminded me of looking at life with the curiosity of a child and what we stopped thinking about while growing up, and our association, which supports volunteers with trainings and activities that will always take them one step forward."

OUR STUDENTS

We include children who are in the 5th, 6th and 7th grades of public schools and who are eager to learn, into our programs to the extent of our capacity. In order to benefit from the program, the students must have a smart device with internet access that they can use at home.

"Hello, I am Mediha Ebrar. I am a 6th grade student. We came across Okul Destek Derneği on social media and my family registered. Teachers are very caring. They helped us immediately when we had a question we could not understand. I understood many topics that I did not understand at school much better in the courses of Okul Destek Derneği. I'm so glad I attended Okul Destek Derneği."

OUR GOALS

"We want to reach 10,000 students and 1,000 volunteers in 2-3 years. Our biggest dream is that every student who is interested in science and mathematics, regardless of their means, will be included in one of our programs and, thanks to the support of our volunteers, will turn into a young person who is self-confident, cares about being useful to society and is full of hope to create the technologies of the future."

Ebru Ataca, one of the Founders of Okul Destek Derneği and Vice President of Board of Directors

Every donation of 2500 TL made by philanthropists who believe in the importance of education enables us to support one more student in one course for a year. Corporate projects enable us to increase this number even further.
